

## Mobility-Flex

The car sharing scheme for your business

**mobility**

Mobility-Flex enables you to open a car sharing station at your company headquarters in no time, giving your employees trend-setting, low-cost mobility. And the best thing of all: the more the car is used, the less you pay.

### It's this simple:

- Mobility supplies the vehicle category of your choice at the desired location.
- You provide the parking space (and an electric charging station if required). Mobility takes care of marking the parking space.
- The car can be reserved by your staff and all Mobility customers. A personal Mobility Card is issued for use as a key.
- On request you can block the car at certain times for use by your staff, guaranteeing exclusive access.

### The more the car is used, the lower the price

You pay an annual charge. In return, you are credited with the sales generated by the Mobility vehicle.

#### **This is how much you get back:**

- 100 % of business-related sales generated by your staff
- 75 % of sales generated by all other Mobility customers

So in the best-case scenario you end up paying nothing at all for Mobility-Flex.

# Mobility-Flex

The car sharing scheme for your business

## Enjoy a wide range of benefits

### Convenient and ecological

- You avoid the expense and bother of private car ownership
- Optimum use of capacity
- Reimbursement of sales generated

### Flexible

- On request: exclusive use at fixed times
- Combined travel: cover lengthier distances by train and use Mobility for the "last mile". This guarantees maximum efficiency in terms of both time and cost.

### Safe and clean

- Mobility cleans and maintains all its vehicles on a regular basis.

### Attractive

- Optimise your expenses system: with a Mobility vehicle, there's no longer any need for private mileage to be paid for, and all insurance issues are dealt with.

## Select a vehicle category
