

Mobility-Flex

The car sharing scheme for your local community

mobility

Mobility-Flex enables you to open a car sharing station in your local community in no time, giving your residents trend-setting, low-cost mobility. And the best thing of all: the more the car is used, the less you pay.

It's this simple:

- Mobility supplies the vehicle category of your choice at the desired location.
- You provide the parking space (and an electric charging station if required). Mobility takes care of marking the parking space.
- The car can be reserved by your staff and all Mobility customers. A personal Mobility Card is issued for use as a key.
- On request you can block the car at certain times for use by your staff, guaranteeing exclusive access.

The more the car is used, the lower the price

You pay an annual charge. In return, you are credited with the sales generated by the Mobility vehicle.

This is how much you get back:

- 100 % of business-related sales generated by your staff
- 75 % of sales generated by all other Mobility customers

So in the best-case scenario you end up paying nothing at all for Mobility-Flex.

Mobility-Flex

The car sharing scheme for your local community

Enjoy a wide range of benefits

An ecological solution that reduces traffic

- Mobility is a key element in qualifying for the *Energie-stadt* label.
- Studies show that one Mobility car takes the place of 11 privately-owned cars.

Flexible

- On request: exclusive use at fixed times

Safe and clean

- Mobility cleans and maintains all its vehicles on a regular basis.

Attractive

- A Mobility vehicle enhances the appeal of your local community.

Select a vehicle category
