

Host a new Mobility station at your company's headquarters

Efficient car sharing will save your company money on costly parking spaces, while managing the pool of vehicles will be outsourced to Mobility. It will also boost your image as an innovative and sustainable company. On request, we will display your company logo on the Mobility vehicles. What's more, your employees can also use the vehicles privately – an attractive perk. As Switzerland's leading car sharing service since 1997, you can trust Mobility with your fleet.
